

Certificate

**Munich Re
Foundation**
From Knowledge
to Action

In 2014, the project work of the Munich Re Foundation
generated greenhouse gas emissions of

1,396 tonnes of CO₂ equivalents

This certificate confirms that these emissions were offset by
emission reductions in the climate protection project

Electricity from landfill gas, Manaus / Brazil

and that the corresponding emission reduction certificates
will be irrevocably retired by First Climate.

Bad Vilbel, in December 2014
